

SELLING SOLUTIONS NOT PROMISES

TOOLING TECHNIK PTY LTD

Tooling Technik supplies various consumable components used in the manufacturing environment. These range from fluid fittings & couplers to heating products. There is also a division that caters for ancillary processing equipment. This varies from water & temperature control equipment to production monitoring services. We have a strong focus on offering service not sales.

TST is a manufacturer of quick connection elements, mainly in the form of Quick Release Couplings/ Coupling Systems.

- Water Couplings
- Pneumatic Couplings
- Safety Couplings
- Swing Couplings
- Quick Action Couplings
- Hydraulic Couplings
- Flat Face Couplings
- Manifolds & Flow Indicator
- Water & Hydraulic Multicouplings
- Mould Cooling Items
- Hoses

PLASSTEZE

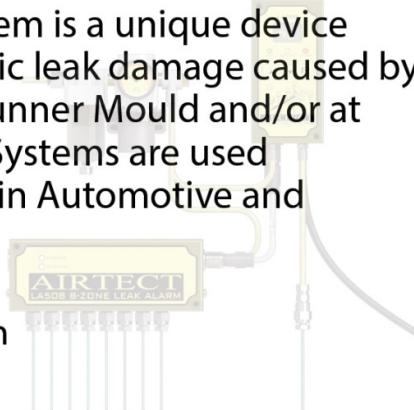

Plassteze offer quality polishing machines & consumables. Offering a full range of polishing products to industries. Products include diamond files, polishing stones, ceramic fiber stones, diamond compound, mounted points, ultrasonic, micromotor and flexible shaft polishing machines.

- Lapping & Polishing Machines & Consumables
- Standard Mould Parts
- Hydraulic Quick Mould Change System
- Magnetic Quick Mold Change System for Injection molding machines
- Electric rotary grinder
- Ultrasonic Cleaning System
- E-Camguard Die and Mould Protection System

AIRTECT

The AIRTECT Plastic Leak Alarm System is a unique device which gives protection against plastic leak damage caused by leaking plastic either within a Hot Runner Mould and/or at the IMM Injection Nozzle. AIRTECT Systems are used worldwide by companies especially in Automotive and Medical Device manufacturing.

- Nozzle & Barrel Protection
- Nozzle & Hot Runner Mould Protection
- Hot Runner Mould Protection

GCheat®

The highest degree.

GC-heat is the specialist for electrical heating elements. Both in the area of tool heating or for the heating of liquids.

- Coil Heater for Nozzle Bodies
- Slide on Heaters
- Temperature Sensors
- Flexible & Rigid Tubular Heaters
- Ceramic Connectors
- Cartridge Heaters

S.I.S.E.

International specialist in interconnected temperature & process control systems for the plastics & composites for industry.

- Sequential Valve Gate Control
- Multi-Zone Controller for hot runner systems
- Water and Oil Temperature Controllers

OUR FACILITIES

Branches:

- Pretoria
- Durban
- East London
- Uitenhage
